# Quantum Generation™

positioned for the Power Blockchain's 295,000% Revolution.

Quantum Generation™ and QUBIT Blockchain® space-based ecosystem with its QSAT Constellation will revolutionize the world in these changing times. We are creating a platform with quantum technology for quantum computing, data storage, fintech, quantum secure communication.

The major players are investing in the new era of technologies. The infancy stage has shown 295,000% gains provided by the assessment of the World Economic Forum. Stating that the blockchain ecosystem by 2027 will store conservatively 10% of the world's GDP

Warren Buffett has stated that the "investment of the decade" is blockchain technology. Buffett has extensive holdings in Blockchain technology.

"Quantum Generation™ space-based technology" is about to go mainstream and reach massive adoption, and that as it becomes a massive part of the new decentralized global economy.

"At its core, blockchain is an extremely secure way to store information through its quantum-proof technology... "with QG™ Quantum Key distribution; it is a hack-proof way to store and deliver information.

# Quantum Generation Space Based Transformation

As Tech, Politics, and COVID-19 strike to take away our freedoms, sovereignty, and wealth, a Global Reset Looms in banking, social media, and communications. Signs are prevalent that we are in a global transformation that will take away our freedoms, privacy and wealth if not prepared.

Example: During COVID-19 many businesses are not taking cash!

Become a part of the Quantum Generation Space Based Community and protect your freedoms, privacy, wealth and sovereignty while creating new global prosperity and legacy.

## QGiD

Our current identity system is broken, fragmented, unsecured, and vulnerable. QUBIT Blockchain:registered: enables autonomous, immutable digital identities. By providing unified, interoperable, and quantum-proof infrastructure with key benefits to enterprises, users, governments.

Moving sovereign autonomous control points for identity to the edges of the Quantum Generation:tm: network, giving more control and sovereignty to people worldwide, organizations, voting, banking, and connected devices where trust cannot be compromised.

# We recognize the unbelievable potential for **Quantum Generation and QUBIT Blockchain®.**

Modernize a \$217 trillion real estate industry...

- Prevent \$1.7 trillion in counterfeiting goods sold each year...
- An electoral voting system with QG's™ QVote™ and QGiD™, making illegal votes a thing of the past and providing a globally secure and private digital iD...
- Through QG Health™ technology assist in reducing healthcare costs significantly....
- Spaced Based Communications platform with the QPhone, QG™ Internet, and QG Space Cloud™ Data Storage [www.QGspacecloud.com](http://www.QGspacecloud.com).
- Spaced based censor proof platform with our Social media and Web Browser encourages autonomous freedom of speech and thought without censorship.
- We are assisting in commerce and food supply.
- Signifolly chang the Banking with the Fintech market”...
- The finance industry is ALL OVER blockchain!

## Early “adoption curve.”

- QG™ is at the Earl Stage point with opportunity for significant gains.
- Financial Markets are changing and we have seen signs and we need to be prepared not to lose our wealth. China and other countries are building new digital economies.
- We have seen in the USA where they will not take cash due to the pandemic. Actions leave clues.

We have seen mass adoption like DTCC (“Depository Trust Clearing Corporation). The DTC clears more than \$54 trillion in stock, mutual funds, and other financial trades every year. “The DTCC recently announced they’re placing \$10 trillion onto the blockchain!”

Global transformation to “tokenization,” that is serving as “utility tokens” and security tokens. To help with the Exchange of money, QUBIT® “token” for each piece, and let people trade those tokens through a Qubit exchange “The Next Visa: The QG’s Qubit Blockchain’ Payment token’ we Predict Will Go Up 16x! Our Team sees that debit and credit cards will be antiquated. They will be replaced by Fintech’ blockchain-backed’ cards solutions that are more secure without borders

We are positioned with QUBIT® fintech to become the next Visa potentially. We are Projecting a climb 16x. Hopefully, recognizing a potential return based on the current market for every five grand of QUBIT® Tokens a return \$80,000!. The company has attracted Goldman Sachs’s Vanguard, Blackrock, and Morgan And billionaire hedge fund managers. QG™ Fintech is in a more competitive situation [than Paypal, Mastercard, or Visa] – QG™ payment systems are hugely lucrative over the long term, of the payment processing fees.

[www.qexchange.ai](http://www.qexchange.ai)

# History and the future

Looking at the big Internet winners like Amazons, Googles, and Facebooks, you need to look behind the curtain companies like Cisco with a more massive return! During the 1990s, Cisco returned a huge 67,491% And was the decade's 5th best stock. Companies like Cisco and Qualcomm provided the technology that was needed to power the internet's big boom.... "Now, that time has arrived again! Quantum Generation™ has brilliantly positioned itself to scoop up billions in revenue by supplying the power of the blockchain boom and a new space-based ecosystem.

Become Part of The "Quantum Generation™" Digital Transformation and the QUBIT® Token Ecosystem! Take a look at [www.qexchange.ai](http://www.qexchange.ai) and [www.quantumgeneration.io](http://www.quantumgeneration.io)

# Summary

Quantum Generation™ has been developing a community to provide an alternative to fight off big tech and governments from canceling free expression, exchange of ideas, trade, and autonomous quantum-proof privacy. Build on a space-based sovereign community where everyone will have access to the internet,

How quantum will change everything (including banking, money, communication, internet, and security)

- Artificial Super Intelligence; machine learning and deep learning; blockchain, shared ledgers, distributed ledger technologies; cryptocurrencies, virtual currencies, and digital currencies;
- Open Banking and Open APIs; and so forth.
- Communications and banking. Ensuring that the information environment remains open, safe, and free Blocking websites and deleting unwanted information lite

Decentralized social networks give users more control and autonomy. An individual can set up their social network and determine how it operates and what users can say. Instead of having content monitored by a corporation, the founder of a federated social network can establish acceptable behavior for the site.

## Censorship on social media platforms

Censorship on major social media platforms, such as Facebook, Twitter, and YouTube, is not a new phenomenon. These companies regularly remove content because a few big tech companies currently dominate social media services, which also serve as a source of news to many users. We are creating the Quantum Generation Movement to build a sovereign and free community with its own economy.

# QVote™

Elections are a symbol of hope and freedom, and the right to vote is an expression of belonging and having a voice. We trust our electoral systems to preserve an immutable record of the voices we have raised and the choices we have made. Yet, the concept of “one person, one vote” is more than just a legal right enshrined in a system. Free and independent elections stand as recognition of our humanity.

Ensure voting is incredibly secure, locked up and beyond, tampering with all thanks to the laws governing subatomic particles, quantum mechanics offers completely radical, new, bizarre ways to implement security using photons and electrons to protect your vote.

In **phase one**, we have contracted to build a Voting Blockchain with an Autonomous Global id using QUBIT Blockchain and Quantum Key Distribution to create a quantum-proof voting platform

**Phase 2-** Generate a bunch of quantum particles, for example, photons, which are particles of light, and you control some property of each photon. They're polarizations, say, which is the direction the light's electric field is oscillating in, and you convert that into zeros and ones. Vertical polarization is, let's say, zero, and horizontal is one for many, many photons. You have a whole sequence. That sequence contains your key, your code, a string of zeros, and ones. That's impossible to predict. You send your string to the polling station. On the other end, a device measures the polarization of each of the incoming photons and extracts the key based on your initial settings. That key can now be used to encrypt your vote, and the polling station uses it to decode your vote. And here's the best part. Let's say some hacker tries to intercept the key. The simple act of observing a photon can disturb its polarization. That's just quantum mechanics.

## How quantum technologies and space-based ecosystem is helping to secure our digital future—the Quantum Generation Opportunity.

Quantum computing, quantum sensing, and quantum communications represent a massive opportunity. Quantum technologies will have a revolutionary effect on almost every aspect of modern life, making unprecedented achievements possible. The exponential power of quantum computing will drive massive scientific discovery, business efficiency, and communications, which will benefit humankind.

QG™ Community will allow uncensored open exchange of ideas without compromising privacy. Our community expects the QG™ Platform to create a level playing field for information sharing and communal activity among individuals, businesses, other organizations. QUBIT Blockchain@ technology accelerates decentralized identity models by providing a web of trust as people, organizations, and connected devices establish and share their own identity created by them and verified by relationships

## Self-Sovereign Identity in a Globalized World: Quantum Generation™ with QKD credential-Based Identity Systems as a Driver for Economic Inclusion and sovereignty

Quantum Generation™, the Space-based blockchain Sovereign ecosystem, is a space-bound solution to confer equal access to the world's wealth to anyone on Earth, regardless of their location, nationality, and economical starting conditions.

Quantum Generation™ is providing a quantum secure blockchain platform utilizing low earth orbit and terrestrial satellite quantum mesh networks, transcending jurisdictional and infrastructural limits. That has been imposed by narrow-minded planning and self-serving objectives prevalent in most developed and developing nations on Earth.

Quantum Generation™ will not be subject to any particular national jurisdiction on Earth. Its location in the Earth's orbit enables it to offer equal access and equal opportunities to participants from all over the globe. It incorporates the concepts of “Building block(chain)s for a better planet” introduced by PwC and the Stanford Woods Institute. The Team strongly believes in responsible blockchains.

**Ubiquitous Under One Sky!**

- o Blockchain Satellite Constellation
- o Quantum Mesh Network™
- o Quantum Communication
- o Quantum Cyber Security
- o QG Space Cloud
- o Qvoting \$ QGiD
- o Quantum Computing
- o Quantum Fintech
- o QPhone
- o QG Social and QG Web
- o Banking/Exchange/Enterprise/Consumer
- o Health/Education/Lifestyle
- o Decentralized Data Storage
- o New Sovereignty!

# Quantum Generation™ QSAT™ Space Network

Quantum Generation™ will begin the deployment of a full global constellation. This space infrastructure will permit full-time connections to the satellite network everywhere in the world at any time. The timing and extent of implementation will depend on developing an advanced personal satellite modem that can be distributed freely or at a very affordable cost.

In summary, Quantum Generation™ plans to develop and perfect the QG space infrastructure and personal user modems needed to create a global blockchain network that provides universal digital currency exchange for everyone on Earth independent of national policies, interference, and legal restrictions.

## Freedom and Decentralization in Space with QUBIT Blockchain® Jurisdictional Agility

Although blockchain technology was initially conceived to put an end to inefficient regulation and the arbitrariness of central authorities and their laws, today's reality looks different. Innovators and founders in the blockchain world are frequently on the lookout for places that will permit them to

pursue their visions freely, without prosecution based on earlier centuries' outdated laws. Much of founders' resources, be it money, time, or brainpower, is wasted on such trivial issues as finding a suitable headquarters for their operations.

Quantum Generation™ is an agnostic QUBIT Blockchain®, based upon the technological paradigms pioneered by Stealth Grid. As described in this paper's background section, revolutionary developments in recent times will serve as fertile grounds for a new and groundbreaking blockchain in Space.

The overarching goal of Quantum Generation™ is to create a satellite network that will deliver not only wi-fi connectivity but direct access to a potent blockchain network around the globe.

Quantum Generation™ is attempting to end this waste and inefficiency: Space is the final frontier and haven for innovators and inventors, for entrepreneurs and business people, from developing and developed countries alike. It is the ultimate conquest of traditional central authority – it replaces centralized dependence with decentralized and evenly distributed independence.

Executing transactions, such as QUBIT Blockchain's® nodes in international Space and terrestrial sovereign locations. It's the critical innovation and reason why QUBIT Blockchain will be favored by industrial users, enabling them to ensure that their transactions occur where they are compliant.

## Quantum Generation Ltd.

Space Based Ecosystem

## The Evolution of Quantum Generations™ Censorship Resistance Platform

Quantum Generation seeks to develop a new kind of censorship resistance by designing the Space-Based ecosystem blockchain to be “intra-jurisdictional” (confined to one jurisdiction) and ultimately “jurisdictionally agile” (able to control which operations take place in explicitly designated jurisdictions). Additionally, providing communication and internet to all corners of the world.

### Our Team has built platforms for:

- o Space-Based FinTech
- o QUBIT Blockchain® ([www.qubitblockchain.io](http://www.qubitblockchain.io))
- o Space-Based Mobile
- o Space Based WIFI & Antennas ([www.qsat.ai](http://www.qsat.ai))
- o Space-Based Social Media Platform ([www.qgsocial.space](http://www.qgsocial.space))
- o Space-Based Web Browser ([www.qweb.space](http://www.qweb.space))
- o Space-Based Banking (<https://www.quantumbank.ai>)
- o Space-Based Cloud ([www.qgspacecloud.com](http://www.qgspacecloud.com))
- o Space-Based Exchange ([qexchange.ai](http://qexchange.ai))
- o Quantum Computing

- o Quantum Cryptography (QKD)
- o Blockchain Voting and Digital ID
- o And more...

Most, if not all, of the jurisdictions on Earth, suffer from hyperregulation. QG™ building a Self-Sovereign Identity in a Globalized World: Credentials-Based Identity Systems as a Driver for Economic Inclusion We are Building a new economy free of censorship, governments, big tech, the QG™ Community

Initially, blockchain technology was conceived to put an end to inefficient regulation and the arbitrariness of central authorities and their laws. Today’s reality looks different: innovators and founders in the blockchain world are frequently on the lookout for places that will permit them to pursue their visions freely, without prosecution based on outdated laws of earlier centuries. Much of founders’ resources, be it money, time, or brainpower, is wasted on such trivial issues as finding a suitable headquarters for their operations.

Quantum Generation™ is attempting to end this waste and inefficiency: Space is the final frontier and haven for innovators and inventors, for entrepreneurs and business people, from developing and developed countries alike. It is the ultimate conquest of traditional central authority – it replaces centralized dependence with decentralized and evenly distributed independence.

## The QWeb™, Decentralized Web

The QWeb™, the decentralized web to take back power from powerful internet giants like Google and Facebook while also creating a more secure and private system with the QG Ecosystem that is P2P and always on, autonomous and secure a new world.

The internet’s data is currently managed largely on centralized, private servers owned by various large companies, now often called the “cloud.” Google, Amazon, Microsoft and a handful of other companies operate these systems, providing the backbone both for their own services and for those of others.

The QG Ecosystem and the orbital and terrestrial quantum mesh network. This will create a new infrastructure to deliver and use this new internet opening up real opportunities and ideas!

Space Based Ecosystem™

# QUBIT® Token

We denote this as the “Dual Utility Principle” and is key to understanding how value is derived from tokens and, thus, the appropriate pricing/market capitalization to assign. Use value is the value obtained from using the token as a medium of exchange to obtain goods or services that satisfy human needs or wants. In this regard, the token behaves precisely as any global currency and any form of money, as Laidler defined (1985). On the other hand, speculative value is the utility obtained from the token as an investment product or asset, which in turn is based on the (expected) returns derived from the asset as its market value increases over time (Merton, 1973). In this instance, the speculative value would be derived as

$$U(\text{QUBIT}) = f\{u_1(\text{use}), u_2(\text{speculation})\}$$

Throughout the rest of this document, for tractability, we shall assume that preferences are stable, convex, and continuous and that the above utility function is quasi-concave in the number of tokens purchased. The total utility derived from QUBIT® Coin will thus govern the demand for QUBIT® Coin tokens, in line with the neoclassical theory of demand (Samuelson, 1938). It, therefore, follows that there shall be two distinct strands of demand for QUBIT Coin tokens, namely demand to satisfy use values and demand to satisfy

speculative values QUBIT Coin’s token price relative to other electronic currency or fiat money increases, resulting in increased token-holder wealth.

These two utility sources are often ignored when calculating the various token metrics for tokens, in favor of a single approach that typically focuses on speculative value. Each value has its own drivers and market levers, which in turn will affect the QUBIT® Coin token’s desirability and hence price/market cap in different ways. By considering the two in tandem, together with the underlying microeconomics that governs each type of value, the aim is to obtain token metrics that are more reflective of their proper market fundamentals and value proposition.

The time is now to acquire the QUBIT Tokens before 2021 starts, where you will see a grab and transfer of wealth by governments and new policies to offset the losses of shutdowns around the world. For more info, email [info@quantumgeneration.io](mailto:info@quantumgeneration.io)

## QUBIT Blockchain:registered:

quantum proof technology accelerates decentralized identity by providing a space based ecosystem of trust as people, organizations, and connected devices establish and share their own identity created by them and verified by relationships.

## Quantum Generation Satellite Blockchain Constellation

Combining The Speed Of Fiber With The Ubiquity Of Satellite.  
New Economy, Sovereignty & Communications Without Boundaries

### Transformational

Transformational sophisticated global constellation of 200 plus cross-linked Low Earth Orbit (LEO) Blockchain satellites. DAPP'S and fiber like data connections, over the planet's entire surface, including across oceans, airways and polar regions

### Orbital & Terrestrial

QSAT seamlessly switching the ground and orbital quantum mesh network for a truly autonomous decentralized P2P network provides high-quality decentralized voice, StealthCrypto® QPhones, QUBIT Exchange™, QUBITFI™, QUBIT Blockchain®, IoT, messaging decentralized data storage, banking. QSAT™ unit will operate as a full node.

# TOKENOMICS

## TOKEN MODEL

Quantum Generation™ (QG™) will deploy in several stages a dual token system.

**Phase One - QUBIT® UTILITY (PAYMENT) TOKEN** will serve as a payment currency within the Quantum Generation™ ecosystem.

The QUBIT® (Quantum Mesh Network) utility token will serve as a payment currency within which will serve as a payment currency within the Quantum Generation™ ecosystem. QUBIT® will also enjoy the benefits of QG™ partners, who will offer 10-15% discounts on purchases made with QUBIT® tokens.

QG™ global services and products will accept QUBIT® as a payment option and QG™ will integrate QUBIT® as a new decentralized global currency accepted for the payment around the world. QUBIT® will also be tradeable on exchanges, enabling token-holders to freely buy and sell the token.

### **Second Phase QG™ SECURITY TOKEN**

The QG™ security token will provide token-holders with 5% pooled profit sharing of the net profit generated by Quantum Generation™ Orbital and ground ecosystem. The profit distribution will be scheduled on a quarterly basis.

The QG™ token will be available to trade on security token exchanges, allowing qualified investors to buy and sell the token and enabling efficient liquidation options 24/7.

Prior QUBIT® token holder will be offered the option QG™ security token QGEN that will provide QGEN token-holders with pooled profit sharing of the net profit generated by Quantum Generation™ Orbital and ground ecosystem. The pre-STO the QUBIT® will be offer a QGEN security token at a projected 4-1 conversion of QUBIT®Utility token (conversion will be based on present values and conversion will decrease). Once filing is approved, we will notify all prior QUBIT® Token holders. They must meet the requirement to participate based on SEC requirements a jurisdiction. And will be managed by a wholly owned subsidiary of Quantum Generation LTD.

**Third Phase:** We are in discussions with several groups and our lawyers regarding a possible IPO or NASDAQ reverse merger. This is ongoing and pre-liminary.

QUBIT® Token supply: 1,000,000,000 with the ability to generate 5,000,000,000 Maximum  
QUBIT® IEO will be launched in three phases

- IEO Phase 1 Starting January 10, 2021 – TBD
- IEO Phase 2 TBD  
IEO price will be 1 QUBIT:registered: + 0.35 cents with initial tiered bonuses.

### **CAUTIONARY STATEMENTS REGARDING FORWARD-LOOKING**

These statements involve known and unknown risks, uncertainties and other important factors that may cause the Company's actual results, performance or achievements to be materially different from any future results, performances or achievements expressed or implied by the forward-looking statements. Forward-looking statements may include, but are not limited to, statements relating to the Company's current and projected operations, financial results, business and products. In some cases, you can identify forward-looking statements by words such as "anticipate," "may," "believe," "could," "should," "estimate," "expect," "intend," "plan," "predict," "potential," "forecasts," "pro
